Based on [this post](#):

```
{
  # ...
  stablePackages = with pkgs; [
    # ...
    (python35Packages.youtube-dl.override {
      ffmpeg = ffmpeg-full;
    })
    # ...
  ];
  # ...
}
```

(To understand what `stablePackages` is here, see [this entry](#).)
